CALL FOR PAPERS

SPECIAL SESSION: Digital Forensics and Security

Digital forensics is playing a more prominent role in network security, and information assurance. The field of study encompasses not just digital evidence, but also the areas of cyber law, sociology, and security to name a few. Digital Forensics and Security Session is an international forum for research, advanced development, exploration, and debate regarding digital forensics and information assurance. The conference covers all aspects of digital Forensics and securing transactions and systems. We solicit previously unpublished papers offering novel research contributions in any aspect of digital forensics and information security or privacy. Papers may present advances in the theory, design, implementation, analysis, verification, or empirical evaluation of secure systems.

The interested topics including but not excluding:

Access control	Anonymity and Privacy
Attacks and defenses	Authentication and Identification
Cloud Computing Security	Embedded systems security
Forensics	Intrusion detection
