The Fifth International Conference on Intelligent Information Hiding and Multimedia Signal Processing (IIH-MSP 2009)

September 12-14, 2009
Kyoto, Japan

Special Session: Circuit Techniques for Multimedia Signal Processing

Recent Multimedia Signal Processing emphasizes on portable and/or wireless applications. The implementation of these multimedia circuits and systems poses many challenges to all aspects of circuit design, digital, analog, and RF. We propose a special session on circuit techniques for multimedia signal processing to provide a international forum for researchers to present and exchange their innovative circuit techniques that tackle practical problems.

Topics of the proposed areas, but not limited to, are multimedia circuit techniques or building blocks for:

- Digital signal processing
- Analog signal processing
- Sensor or sensor networks
- Low-power techniques
- Wireless or RF

Paper Submission:
Papers are invited from prospective authors with interests in this special session or related areas of applications. All contributions should be original and not published elsewhere or intended to be published during the review period. Contributions from industry are welcomed. All papers are to be submitted electronically in PDF format to the special session organizer. Details of the required paper format are given at the official IIHMSP09 website (http://bit.kuas.edu.tw/~iihmsp09/ and http://www. iipl. is.ritsumei.ac.jp/iihmsp2009)

Important Dates

Deadline for paper submission:	March 05, 2009
Date of notification:	April 30, 2009
Deadline for camera-ready manuscript submission:	May 31, 2009
