Special Session: Multimedia Signal Processing and Application

Theories and techniques of intelligent computing have been successfully applied to a wide range of complex problems. The objective of this special session is to provide a forum for academics and industrial professionals to contribute and to disseminate innovative and important new work in the multimedia signal processing and applications.

Topics of interest include but are not limited to:

- Pattern recognition
- Statistical signal and image analysis
- Multimedia signal and image processing and application
- Others

Submission of Papers

Papers are invited from prospective authors with interests in the related areas. All contributions should be original and not published elsewhere or intended to be published during the review period. Contributions from multidisciplinary research fields are especially welcomed. **Submissions of full papers should be made directly to the session chairs by the following email address: hanxhua@fc.ritsumei.ac.jp, tomoko@augusta.eee.u-ryukyu.ac.jp.**
