

CFP: Special Session in IIH-MSP2009

Industry Trends in Information Hiding and Multimedia Signal Processing

Conference website: <http://www.iipl.is.ritsumei.ac.jp/iihmsp2009/>

(Kyoto, Japan, Sep. 12-14, 2009)

Scopes:

Information Hiding and Multimedia Signal Processing technologies are undoubtedly becoming more and more attractive to professionals both from academic and industrial areas. Researchers and engineers are facing the same problems and challenges in their researches and developments. We believe that making researchers and engineers more understanding to each other would lead to valuable research theme setting and exciting product innovations. We, therefore, organize this special session, invite speakers from industry to present recent industrial trends in information hiding and multimedia signal processing, and share their visions on the technologies from industrial viewpoint with academic researchers. We also expect to promote some successful industrial-academic cooperation through this session.

Submission and presentation:

We invite researchers and engineers in industry to present industrial trends in information hiding and multimedia signal processing. **The prospective authors should submit one page summary (including paper title and author list) to Prof. Yen-Wei Chen (chen@is.ritsumei.ac.jp) by July 22, 2009.** The summary will be published in the conference program booklet. The presentation time will be 20 min. The authors need to pay registration fee (JPY 58000) at the reception desk on the day of the conference. The registration fee includes attendance of all technical sessions and keynote lectures, one proceeding CD-ROM, Banquet, Reception and coffee breaks. If you have any questions, please feel free to ask the session organizer

Session Organizer:

Prof. Yen-Wei CHEN
