The Sixth International Conference on Intelligent Information Hiding and Multimedia Signal Processing

(IIH-MSP 2010)

October 15-17, 2010 Darmstadt, Germany

Special Session:

Circuits and Embedded Systems for Multimedia Signal Processing

Recent Multimedia Signal Processing emphasizes on portable and/or wireless applications. The implementation of these multimedia circuits and embedded systems poses many challenges to all aspects of circuit design, digital, analog, and RF. We propose a special session on circuit and system techniques for multimedia signal processing to provide an international forum for researchers to present and exchange their innovative circuit techniques that tackle practical problems.

Topics of the proposed areas, but not limited to, are multimedia circuit techniques or building blocks for:

- digital signal processing
- analog signal processing
- video and audio processing
- FPGA and embedded system design
- low-power circuit and system techniques

Paper Submission

Papers are invited from prospective authors with interests in this special session or related areas of applications. All contributions should be original and not published elsewhere or intended to be published during the review period. Contributions from industry are welcomed. All papers are to be submitted electronically in PDF format to the special session organizer. Details of the required paper format are given at the official IIHMSP09 website (http://bit.kuas.edu.tw/~iihmsp10/)

Important Dates

Deadline for paper submission: April 04, 2010
Date of notification: May 31, 2010
Deadline for camera-ready manuscript submission: July 02, 2010

Session Organizer:

Dr. Ming-Hwa Sheu, Department of Electronic Engineering, Yunlin University of Science & Technology, Taiwan (sheumh@yuntech.edu.tw)
