

Call for papers for the Journal of Information Hiding and Multimedia Signal Processing

Special issue on the enrichment of sound, speech and music media

Guest editors: Prof. SUZUKI, Yôiti (Tohoku University)
Prof. ITO, Akinori (Tohoku University)
Prof. KONDO, Kazuhiro (Yamagata University)

Scope: Information conveyed by sound, including speech, music, and spatial audio is an essential component of multimedia information. The advancement of sound media enrichment technology will definitely play an essential role in the advancement of multimedia communication. This special issue will deal with all aspects of enrichment of sound media through advances in enrichment and intelligent information processing technology, including but not limited to its theory, technology base, and system implementation. Note that we intend to interpret the key phrases "enrichment" and "intelligent information processing" to cover a much broader range than one would normally do.

Submission Guidelines: Manuscripts should be submitted to the JIHMSp website <http://www.ijhmsp.org/>.

The authors should clearly indicate that the paper is submitted for publication in the special issue on the enrichment of sound, speech and music media by selecting "IV: Special Issue" "Enrichment of Sound, Speech and Music" in the pull-down menu of the Category section in the submission web page.

The manuscripts should adhere to the formal guidelines of the journal.
