# The First Euro-China Conference on Intelligent Data Analysis and Applications (ECC 2014)

http://bit.kuas.edu.tw/~ecc14/

June 13-15, 2014

Shenzhen, China

## Special Session: *Multimedia Sensory Systems and Its Applications*

**Call for Papers:**

Recent advances in circuits and systems significantly lower the cost of manufacturing sensory devices, and the proliferation of multimedia sensors is expected to enrich smart environments in the near future. Interesting applications based on multimedia sensors have been proposed and investigated in the recent past, with various challenges arise for deploying an ambient intelligence environment. This special session is organized to provide a forum for international experts to present and discuss recent development in multimedia sensory systems. The scope of this special session includes, but is not limited to, the following:

- Multimedia sensor devices
- Internet of things
- Multimedia sensor network protocols
- Multi-sensor data fusion
- Smart home

- Healthcare applications using multimedia sensors
- Ambient intelligence environment
- Surveillance and monitoring applications

**Submission:**

All accepted papers will be included in the Conference Proceedings, which will be published by Springer as part of the Studies in Advances in Intelligent and Soft Computing series. The Springer template (MS Word, LaTeX) is available at http://www.springer.com/series/4240, under "Instructions for Authors". Papers should not exceed 10 pages, and the submission link is https://www.easychair.org/conferences/?conf=eccmss2014.

**Important Dates:**

Deadline of submission: February 20, 2014
The date for notification: March 10, 2014
The date for camera-ready submission: March 28, 2014

**Special session organizer:**

Dr Ivan Lee
School of Information Technology & Mathematical Sciences
University of South Australia
Mawson Lakes, South Australia, 5095
