Abstract

We are organizing a special session – Semantic technologies and Knowledge reasoning, for HIS 2009 which will be held in Shenyang on August 12-14, 2009. The usefulness of the semantic web depends on whether the ontology can be constructed correctly and an useful knowledge representation and reasoning. The session will let researchers share their experiences and discuss advanced techniques in the field of Semantic technologies and Knowledge reasoning together.

Topics of interest include, but are not limited to :

1. Ontology representation, operations and its applications
2. Expert system and its applications
3. Data and knowledge engineering
4. Semantic web technologies and its applications
5. Intelligent search and data clustering
6. Knowledge reasoning
