IIH-MSP 2014 Invited Session Proposal

INVITED SESSION TITLE:

Signal Processing Methods for Music Information Retrieval in the Future Internet

This invited session will discuss the signal processing methods for music information retrieval in the future Internet, including analysis, recognition and synthesis of a music signal, computational modeling of music perception and cognition, musical source separation, music recommendation, user interfaces for musical performance and visualization, and so on. The invited session will promote collaboration among the researchers in this research field.

Special Session Organizers:

Prof. Kyogu Lee (kglee@snu.ac.kr)
Seoul National University, Korea
Prof. Akinori Ito (aito@spcom.ecei.tohoku.ac.jp)
Tohoku University, Japan

Special Session Organizers:

Six invited lecturers (two from Korea, two from China and two from Japan) have promised to submit invited papers. Detailed information will be given soon later.
