

**2008 International Conference on Intelligent System Design
and Application (ISDA-08)**

November 26 - 28

Kaohsiung City, Taiwan

Call for Paper
**Invited Session on intelligent technology for
ubiquitous computing**

As mobility technologies has evolved rapidly, ubiquitous, grid, and peer-to-peer computing provides services any time any where. Many businesses adopt it to gain a competitive edge. To realize such new service paradigm, it is important to develop intelligent systems suitable for such wireless ubiquitous networks. The special session aims to promote the research on intelligent systems for delivering total solutions on different aspects including new communication technology, applications, and case studies.

Suggested topics include (but not limited to):

- ❖ Intelligent systems, services, and technology for wireless and ubiquitous networks
- ❖ Mobile intelligence for ubiquitous computing
- ❖ Artificial intelligence and data mining for ubiquitous computing
- ❖ Automated service in ubiquitous networks
- ❖ Security issues in ubiquitous computing

Paper Submission

Papers are invited from prospective authors with interest on the related subjects. Each paper should follow the double columns IEEE format with up to 4 pages. All papers must be submitted electronically in PDF format to cchen@mail.nsysu.edu.tw.

Important Deadlines

Deadline for paper submission: **May 01, 2008**

Notification of acceptance: **June 01, 2008**

Deadline for camera-ready manuscript: **July 01, 2008**
