

The Eighth International Conference on Intelligent Systems Design and Applications

November 26-28, 2008, Kaohsiung City, Taiwan

CALL FOR PAPERS

SPECIAL SESSION: Optimization methods, binomial systems, and applications to the market equilibrium

This special session invites colleagues worldwide to share their experience and discuss recent research results. Topics of interest include but are not limited to:

1. Optimization theory and applications
2. Numerical algorithms to solve complementarity and variational inequality problems
3. Nonstandard positional digital systems, including binomial and factorial ones
4. Development of specialized digital devices, controllers, etc.
5. Optimization techniques to solve equilibrium problems with application to energy markets

Submission:

Papers are invited from prospective authors with interests in this particular session and related areas of applications. Each paper should be original and not published elsewhere or intended to be published during the review period. Contributions from more applied related fields in industry and commerce are welcome. All papers should be submitted electronically in PDF format to the special session organizers. Details of the required paper format are at the official ISDA08 website (<http://bit.kuas.edu.tw/~isda08/>).

Full paper due date: May 15, 2008

Notification: June 15, 2008

Camera-ready paper deadline: July 15, 2008

For further information, please contact:

Special Session Organizers:

Dr. Vyacheslav Kalashnikov (kalash@itesm.mx), Department of Systems and Industrial Engineering for the Technological Institute of Monterrey (ITESM), Monterrey, Mexico

Prof. Dr. Alexei Borisenko (electron@sumdu.edu.ua), Department of Industrial Electronics and Computing for the Sumy State University, Sumy, Ukraine
